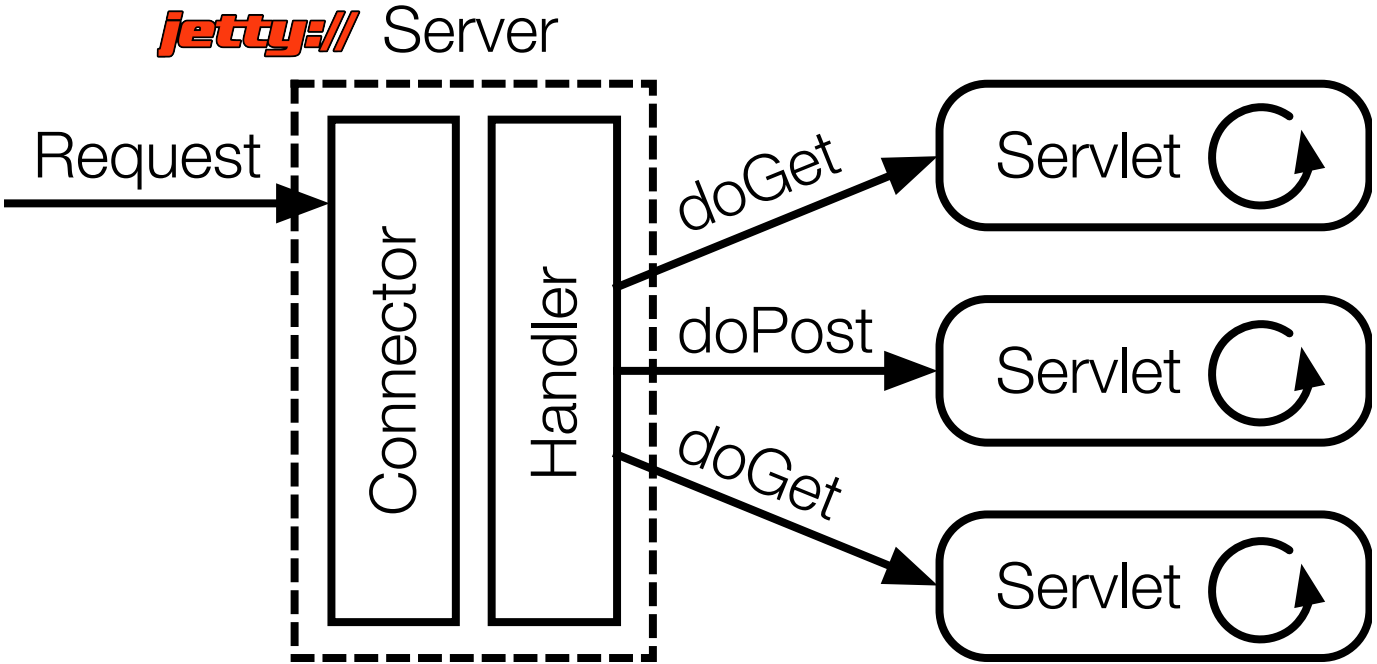
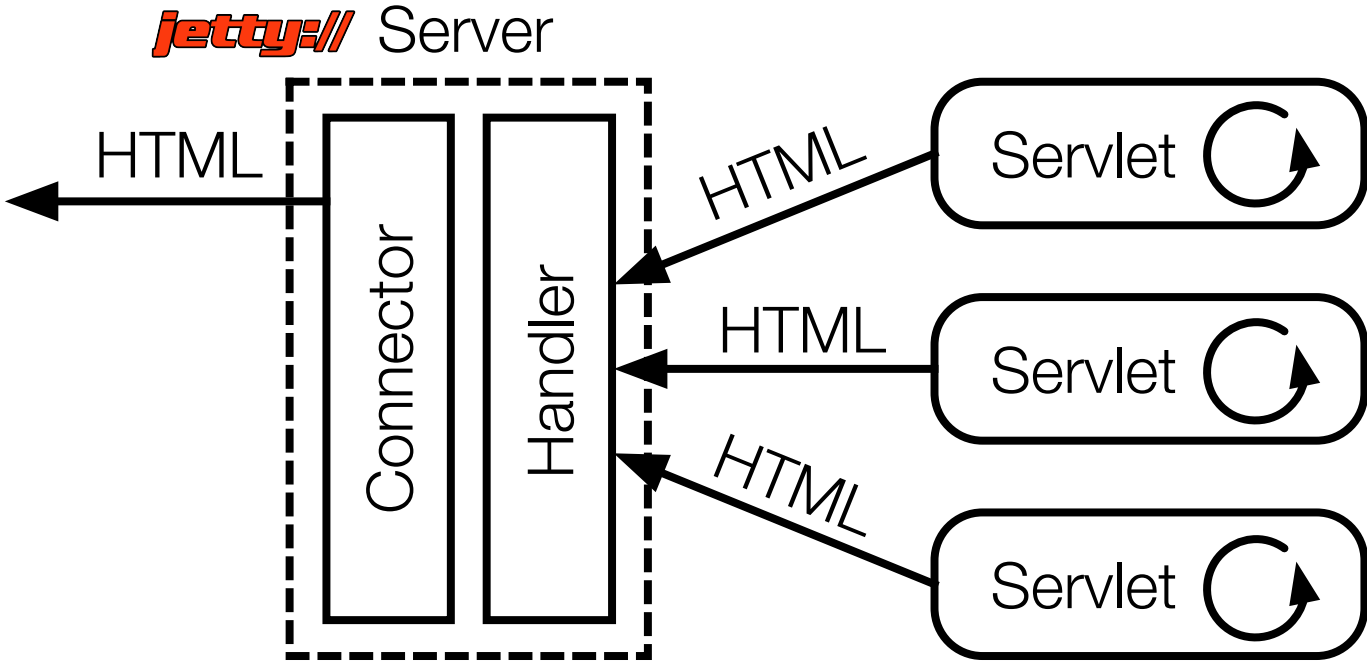
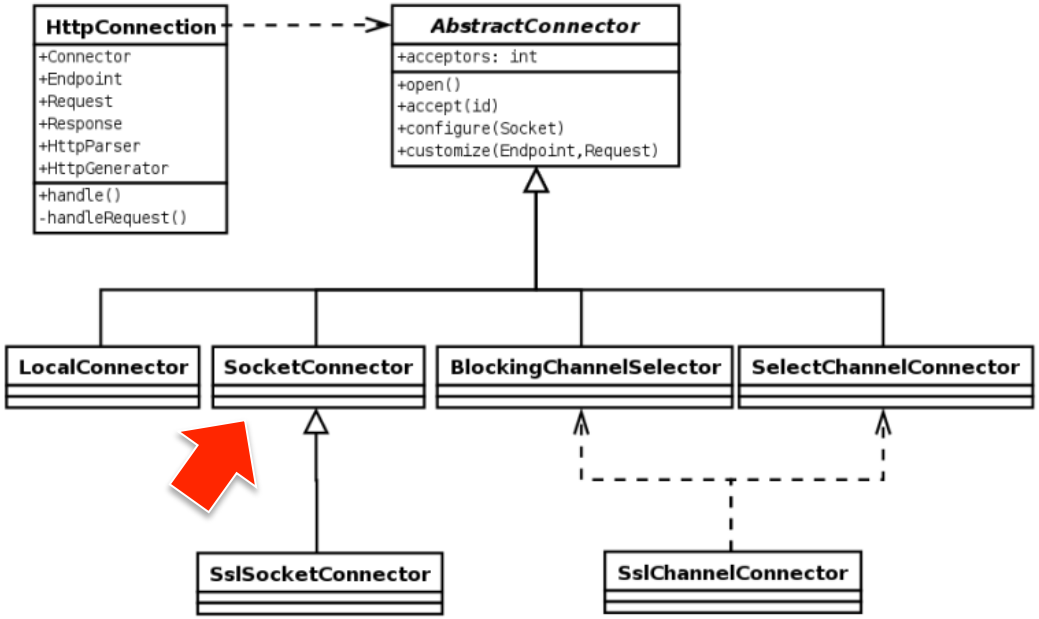
Dynamic Web Pages (Jetty)



Dynamic Web Pages (Jetty)

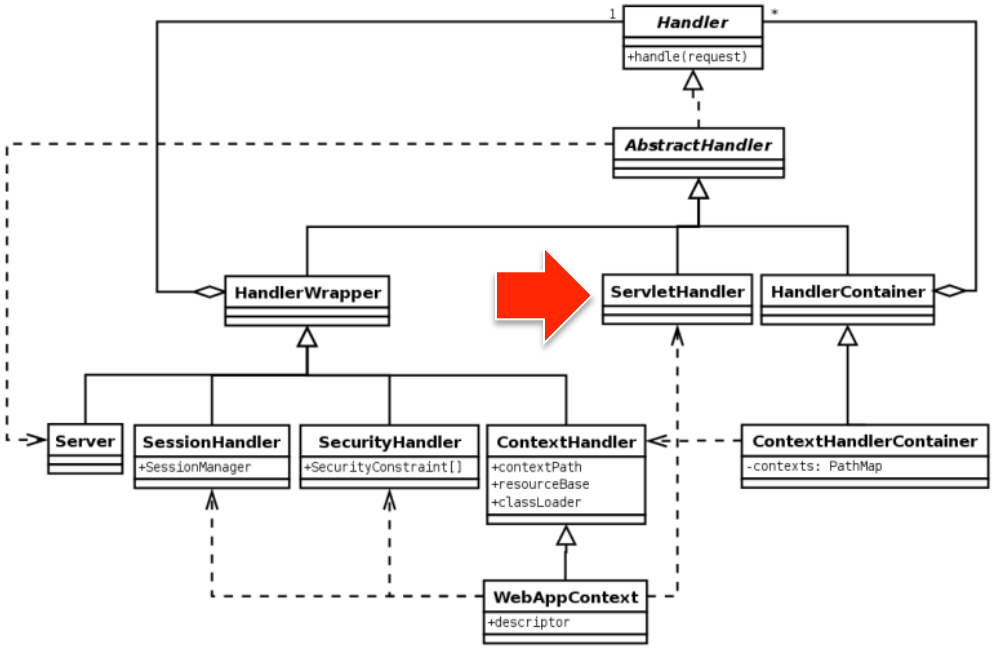


Jetty Connectors



http://www.eclipse.org/jetty/documentation/current/architecture.html

Jetty Handlers



http://www.eclipse.org/jetty/documentation/current/architecture.html

Java Servlets and Jetty

- Servlets
  - Java package for servicing HTTP requests
  - Generates HTML for dynamic web pages
  - Used by web servers, not a web server itself
- Jetty
  - Embeddable, multithreaded web server in Java
  - Good for single-purpose applications or prototyping

Java Servlets and Jetty

```
1  public static void main(String[] args) throws Exception
2  {
3      ServletHandler handler = new ServletHandler();
4      handler.addServletWithMapping(HelloServlet.class, “/”);
5
6      Server server = new Server(8080);
7      server.setHandler(handler);
8      server.start();
9      server.join();
10  }
```

http://www.eclipse.org/jetty/documentation/current/advanced-embedding.html

Java Servlets and Jetty

```
1  public static class HelloServlet extends HttpServlet {
2    @Override
3    protected void doGet(HttpServletRequest request,
4                         HttpServletResponse response)
5                         throws ServletException, IOException {
6      response.setContentType(“text/html”);
7      PrintWriter out = response.getPrintWriter();
8      out.printf(“<p>hello!</p>”);
9      response.setStatus(HttpServletResponse.SC_OK);
10   }
11 }
```

API Documentation

- Servlet Documentation
  - http://docs.oracle.com/javaee/6/api/
  - Go to javax.servlet package
- Jetty Documentation
  - http://download.eclipse.org/jetty/stable-9/apidocs/
  - http://www.eclipse.org/jetty/documentation/

Installing Jetty (for Embedding)

- Download latest aggregate 9.x.x Jetty jar file
  - http://central.maven.org/maven2/org/eclipse/jetty/aggregate/jetty-all/
- Download latest javax.servlet 4.x.x jar file
  - http://central.maven.org/maven2/javax/servlet/javax.servlet-api/
- Add to Eclipse as a third-party library

http://www.eclipse.org/jetty/documentation/current/advanced-embedding.html

Installing Jetty (for Embedding)
